Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Proposals to distinguish the claimed invention over the prior art were discussed. Support for the prior amendments in the specification were discussed. The examiner noted that support for the specific Zr compound species in Figures 2-3 does not necessarily provide support for the broad genus of metal compounds discussed in paragraph 3 of the last office action. In addition, it was suggested that "consisting" language be used (e.g. claim 1, line 3) to distinguish over the prior art use of metal compounds. Antecedent support of claim language in the written specification was also discussed..
